

WENJING XIAO

Ph.D. Student, School of Public Administration, East China Normal University
Shanghai, China | wenjingx2021@163.com | +86 159-4689-9036

RESEARCH INTERESTS

pension systems and pension finance; population ageing; social security policy; long-term care; and health inequality among older adults.

EDUCATION

East China Normal University **Shanghai, China**

Ph.D. Student in Social Security, School of Public Administration **Sep. 2025 – Present**

- Current coursework: Social Security Theory, Social Science Research Methods, Public Policy Analysis.

Zhongnan University of Economics and Law **Wuhan, China**

M.A. in Management, Social Security **Sep. 2022 – Jun. 2025**

- Selected coursework: Social Security Theory, Pension Insurance and Elderly Care Services, Medical Insurance, Social Research Methods, Intermediate Econometrics.

Jiangxi Normal University **Nanchang, China**

B.A. in Economics, Economics **Sep. 2018 – Jun. 2022**

- Selected coursework: Econometrics, Statistics, Public Finance, Development Economics.

PUBLICATIONS AND MANUSCRIPTS

Peer-reviewed Publications

- Yang, H., **Xiao, W.**, & Fang, G. (2024). Long-term care arrangements and mortality risk among disabled older adults. *Chinese Journal of Population Science (in China)*, 38(3), 114–128. CSSCI.
- Yang, H., Wang, J., & **Xiao, W.** (2023). The impact of childbearing on marital satisfaction. *China Youth Study (in China)*, 2023(5), 82–93, 96. CSSCI.
- Yang, H., Wang, J., **Xiao, W.**, & Liu, Y. (2023). The impact of Internet use on marital satisfaction. *Population Journal (in China)*, 45(1), 96–112. CSSCI.

Manuscripts under Review

- **Xiao, W.**, & Lu, J. (under review). Long-term care arrangements and out-of-pocket medical expenditures among disabled older adults in China: Evidence from the CLHLS 2018. Manuscript submitted to *BMC Geriatrics*.
- **Xiao, W.**, & Lu, J. (under review). Living arrangements and mortality risk among older adults.
- Lu, J., & **Xiao, W.** (under review). Widowhood shock, weakened support systems, and mortality risk among older adults.

SELECTED RESEARCH EXPERIENCE

Long-term Care Arrangements and Mortality Risk among Disabled Older Adults

Co-author **Jun. 2023 – May. 2024**

- Used four waves of the Chinese Longitudinal Healthy Longevity Survey (CLHLS, 2008–2018) to examine the relationship between long-term care arrangements and mortality risk among disabled older adults.
- Applied Cox proportional hazards models to estimate mortality risks associated with different care arrangements, with further comparisons between formal and informal care.

- Participated in research design, literature review, data collection, variable construction, data cleaning, and empirical analysis using Stata.
- Contributed to the interpretation of empirical results, manuscript drafting, revision, and proofreading.
- The study was published in Chinese Journal of Population Science, a CSSCI-indexed journal.

Long-term Care Arrangements and Out-of-pocket Medical Expenditures among Disabled Older Adults in China

First author

2024 – Present

- Used the 2018 wave of the Chinese Longitudinal Healthy Longevity Survey (CLHLS) to investigate how different long-term care arrangements are associated with out-of-pocket medical expenditures among disabled older adults in China.
- Constructed measures of disability status, long-term care arrangements, medical expenditures, health status, and socioeconomic characteristics.
- Applied econometric methods including ordinary least squares regression, instrumental variable estimation, and robustness checks to address potential selection bias and endogeneity concerns.
- Examined potential mechanisms related to health monitoring and access to timely medical treatment.
- Led the empirical analysis, manuscript writing, revision, and journal submission process. The manuscript is currently under review at BMC Geriatrics.

National Social Science Fund Later-stage Project: Fertility and Welfare of Older Adults Research

Assistant

2021 – 2022

- Assisted in literature collection and evidence synthesis on fertility behavior, population ageing, and older adults' welfare.
- Used CLHLS data to examine the relationship between fertility behavior and older adults' health outcomes, including self-rated health and chronic disease risk.
- Applied OLS and logit models to conduct empirical analyses and summarize key findings.
- Contributed to policy implication development and project report writing.
- Strengthened training in translating empirical findings into social policy discussions.

HONORS AND AWARDS

- Outstanding Graduate Student, Zhongnan University of Economics and Law, 2022–2023.
- First-Class Academic Scholarship, Zhongnan University of Economics and Law, 2022–2023; 2023–2024.
- National Grand Prize, “Challenge Cup” National Undergraduate Academic and Technological Works Competition, Red Special Project, 2021.
- Provincial First Prize, Huachuang Cup Survey and Analysis Competition, Jiangxi Province.
- First-Class Academic Scholarship, Jiangxi Normal University, 2019–2020; 2020–2021.
- Second-Class Academic Scholarship, Jiangxi Normal University, 2018–2019.

RESEARCH SKILLS

- Research Design: Literature review, research question development, conceptual framework construction, and policy implication development.
- Empirical Analysis: Survival analysis; regression-based modeling; causal inference approaches; robustness checks and mechanism analysis.
- Data Experience: Longitudinal survey data analysis using CLHLS and CFPS; data cleaning, variable construction, sample restriction, and empirical result interpretation.
- Software and Languages: Stata; English IELTS 6.0, CET-6.
